PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer with MCA degree and strong foundation in machine learning, natural language processing, and deep learning. Proven expertise in building production-ready ML pipelines, implementing NLP solutions, and leveraging LLMs with RAG frameworks. Proficient in Python, Scikit-learn, TensorFlow, and Google Cloud's Gemini models. Seeking entry-level AI/ML Engineer role to develop scalable AI systems and contribute to innovative projects.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch, NLP, Deep Learning, Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, TF-IDF, Logistic Regression, Naive Bayes

Generative AI: Large Language Models (LLMs), LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Google Cloud Gemini

Data Processing: Pandas, NumPy, Data Preprocessing, EDA, Feature Extraction, Data Cleaning, Model Training, Model Evaluation

Cloud Platforms: Google Cloud (BigQuery, Gemini AI), AWS (Solutions Architecture)

Databases: MySQL, MongoDB, SQL

Tools & Platforms: Git, GitHub, Jupyter Notebook, Anaconda, FastAPI, VS Code

Core Competencies: Data Structures & Algorithms, OOP, SDLC, Machine Learning Pipelines, Model Optimization, Statistical Analysis

PROJECTS

SMS Spam Detection System

Developed end-to-end machine learning classification model detecting Spam vs. Ham SMS messages using NLP techniques. Implemented TF-IDF feature extraction, trained Naive Bayes and Logistic Regression models, and achieved 96.5%-97.2% accuracy. Performed text preprocessing including tokenization, stop word removal, and case normalization. Conducted model evaluation using precision, recall, F1-score, and confusion matrix analysis.

Technologies: Python, Scikit-learn, NLP, TF-IDF, Pandas, NumPy, Logistic Regression, Naive Bayes

Dataset Quality and Annotation Validation Tool

Built Python-based data quality validation tool that automatically detects annotation errors and data inconsistencies before ML model training. Implemented statistical validation, class distribution analysis, and outlier detection using Pandas and NumPy. Designed comprehensive reporting system exporting validation results in JSON and CSV formats. Improved dataset reliability by identifying 15+ critical data quality issues.

Technologies: Python, Pandas, NumPy, Data Validation, Statistical Analysis, Outlier Detection, Data Quality Assurance

EXPERIENCE

AI/ML Internship | Edufyi x IBM (2026)

Contributed to machine learning model development and data preprocessing for education-focused AI initiative. Collaborated with IBM mentors on practical ML deployment workflows and model optimization techniques. Gained hands-on experience in data pipeline development and model evaluation methodologies.

Generative AI Powered Data Analytics Job Simulation | Tata Group (via Forage) (2026)

Applied generative AI concepts to real-world data analytics workflows. Explored practical applications of LLMs and Gemini models in analytical tasks. Developed understanding of prompt engineering and AI-driven insights generation.

AWS Solutions Architecture Job Simulation | Forage (2025)

Completed AWS solutions-architecture tasks in simulated environment. Built understanding of cloud-based ML infrastructure and scalable system design using Amazon Web Services.

Data Analytics Job Simulation | Deloitte (via Forage) (February 2026)

Completed practical data analysis and forensic technology tasks. Developed proficiency in analytical methodologies and data-driven decision-making processes relevant to ML engineering.

Python Course Internship | SkillDzire (May-June 2025)

Completed comprehensive Python internship covering core language proficiency, data structures, and applied programming for machine learning applications.

EDUCATION

Master of Computer Applications (MCA) | Narayana Engineering College, JNTU Anantapur (2026)

CGPA: 9.0/10.0 | Relevant Coursework: Data Structures & Algorithms, OOP, SDLC, Machine Learning Fundamentals, Database Design

Bachelor of Science in Computer Science | Chaitanya Bharathi Degree College (2024)

Percentage: 82% | Focus: Core CS Principles and Programming

CERTIFICATIONS & ACHIEVEMENTS

Google Cloud Skills Boost - Gold League (3,004 Points)

Work with Gemini Models in BigQuery | Gen AI: Unlock Foundational Concepts | Gen AI: Beyond the Chatbot | Introduction to Image Generation | Using BigQuery Machine Learning for Inference | Gemini for Data Scientists and Analysts

AWS Solutions Architecture Certification | Forage

Tata Group Generative AI Data Analytics Certification | Forage

Power BI Workshop Certification | OfficeMaster

Professional Development Training | Wadhvani Foundation & APSDC

Career Orientation Workshop | Narayana Engineering College

Startup Business Management Programme | AVISHKANDHARA / AP Innovation Society

ADDITIONAL INFORMATION

Open to AI/ML Engineer, Data Scientist, and Machine Learning roles in India and remote positions. Proficient in Agile methodologies and collaborative development practices. Strong analytical and problem-solving skills with emphasis on production-ready solutions.
