PROFESSIONAL SUMMARY

Skilled Python Developer with MCA degree demonstrating strong proficiency in building robust backend applications, REST APIs, and data processing solutions. Expert in Python, FastAPI, and object-oriented programming with proven ability to develop scalable applications. Experienced in database design, API development, and automation workflows. Seeking entry-level Python Developer position to contribute expertise in backend development and create high-quality software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL

Web Frameworks & APIs: FastAPI, REST API Development, API Integration, JSON Processing

Backend Development: Object-Oriented Programming (OOP), Design Patterns, Software Architecture, Automation, Web Scraping, Server-Side Logic

Databases: MySQL, MongoDB, SQL Query Optimization, Database Design, CRUD Operations, Schema Modeling

Data Processing: Pandas, NumPy, Data Cleaning, CSV/JSON Handling, File Processing, Batch Operations

Development Tools: Git, GitHub, VS Code, Jupyter Notebook, Anaconda, Linux Command Line, Debugging, Logging

Development Practices: SDLC, STLC, Agile Methodologies, Version Control, Code Review, Testing, Documentation

Core Competencies: Data Structures & Algorithms, Problem Solving, System Design, API Architecture, Performance Optimization

PROJECTS

SMS Spam Detection System

Developed production-grade Python application implementing spam detection classifier with REST API endpoints for real-time predictions. Built data pipeline handling CSV ingestion, text preprocessing, and feature transformation. Implemented model serving using Python and created reusable code modules for prediction service. Designed system supporting batch and real-time prediction modes with comprehensive error handling and logging.

Technologies: Python, FastAPI, Scikit-learn, Pandas, REST API, JSON, CSV Processing, Database Integration

Dataset Quality and Annotation Validation Tool

Engineered comprehensive Python-based validation framework automating data quality checks and annotation verification workflows. Developed modular validation system with extensible validators for different data types. Implemented automated report generation exporting results in JSON, CSV, and HTML formats. Created command-line interface and programmatic API for integration into existing data pipelines. Built statistics engine computing data distributions, imbalances, and quality metrics.

Technologies: Python, Pandas, NumPy, File I/O, JSON/CSV Export, Automation, Error Handling, Architecture Design

EXPERIENCE

Python Course Internship | SkillDzire (May-June 2025)

Completed intensive Python internship covering core language constructs, data structures, and applied programming exercises. Developed proficiency in Python best practices, code organization, and debugging techniques. Implemented multiple projects demonstrating mastery of Python fundamentals applicable to professional development.

AI/ML Internship | Edufyi x IBM (2026)

Contributed to machine learning backend development and data preprocessing pipelines. Worked with Python-based tools and frameworks for data processing and model integration. Collaborated on production deployment workflows and code optimization strategies.

Generative AI Powered Data Analytics Job Simulation | Tata Group (via Forage) (2026)

Developed data processing workflows using Python for analytical applications. Integrated external APIs and data sources for automated pipeline development. Explored Python integration with cloud services and data transformation techniques.

AWS Solutions Architecture Job Simulation | Forage (2025)

Studied cloud-native Python application development and deployment strategies. Learned best practices for building scalable backend services on AWS infrastructure.

Data Analytics Job Simulation | Deloitte (via Forage) (February 2026)

Completed practical projects involving data processing and analysis using Python libraries. Developed proficiency in transforming raw data into actionable insights through Python automation.

EDUCATION

Master of Computer Applications (MCA) | Narayana Engineering College, JNTU Anantapur (2026)

CGPA: 9.0/10.0 | Relevant Coursework: Data Structures & Algorithms, OOP, SDLC, STLC, Database Design, Software Engineering Principles

Bachelor of Science in Computer Science | Chaitanya Bharathi Degree College (2024)

Percentage: 82% | Focus: Programming Languages and CS Fundamentals

CERTIFICATIONS & ACHIEVEMENTS

Google Cloud Skills Boost - Gold League (3,004 Points)

Work with Gemini Models in BigQuery | Introduction to Generative AI | FastAPI and Cloud Integration training

AWS Solutions Architecture Certification | Forage

Power BI Workshop Certification | OfficeMaster

Professional Development Training | Wadhvani Foundation & APSDC

Career Orientation Workshop | Narayana Engineering College

Startup Business Management Programme | AVISHKANDHARA / AP Innovation Society

ADDITIONAL INFORMATION

Open to Python Developer, Backend Developer, and Software Engineer positions in India and remote locations. Experienced in full software development lifecycle with emphasis on code quality and maintainability. Proficient in Agile development practices and collaborative team environments. Strong debugging and problem-solving abilities with focus on elegant, efficient solutions.
